Cleaning principle

The hand-held electric flexible shaft is used to drive the brush for dry cleaning of the ventilation pipe. The electric brush swipes the inner wall of the air pipe at high speed to peel the dust from the pipe wall. The dust raised by the high-power industrial negative pressure vacuum cleaner is inhaled from the dust suction port and enters the dust filter bag of the dust collection box through the hose to achieve the purpose of cleaning the air pipe.

KT-928 Product function characteristics

It is suitable for cleaning round pipe and rectangular pipe that cannot be accessed by human(80-800mm). Flexible shaft can hover operation, no need to disassemble, coil support can be fixed, which can saving working space; Wheeled coil support is designed according to human mechanics, which is convenient for engineering construction.

Reversible design

It contains a variety of rotation methods: forward, reverse, timing automatic forward and reverse rotation. the variety of rotation methods can avoid any dead corner. The start time of automatic forward and reverse rotation can be set; Manual forward and reverse turn can be adjusted according to the need for forward, reverse, cruise buttons.

Adjustable speed

Adjustable speed range 0-1000 RPM. Equipped with soft and hard brush, can be used for all kinds of dirt cleaning, and avoid any residue.

Flexible shaft circling operation

Flexible shaft can hover operation, so it's no need to disassemble: Coil support can be fixed, which can save working space; Wheeled coil support is designed according to human mechanics, which is convenient for engineering construction.

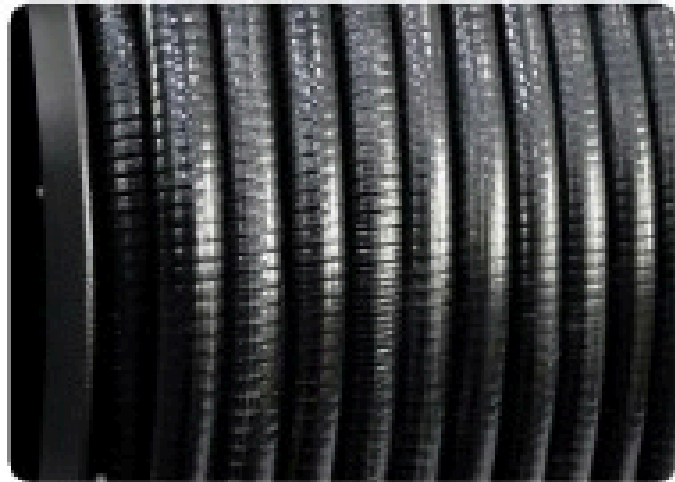

Manual/remote control mode

It has manual operation mode and remote control, which is convenient for single operation.

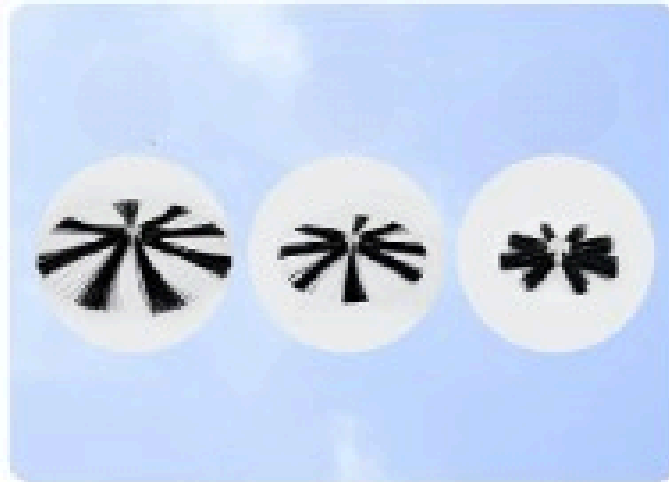

Reversible design | Clean all kinds of dirt| long-distance cleaning

KT-928 Quality accessories

High elasticity non-bending hose

22m&45m long high elastic hose, the whole steel bone body and metal corrugated plastic pipe make it flexible and automatic straightening. Bending operation ability and no risk of erosion make it can be used for a long time.

Suitable for various cleaning brushes

Choose the right brush according to the pipe diameter of the field condition, the brush size can be 80-800mm, and the cleaning brush can be customized.

Leakage protection switch

It can avoid leakage electric shock accidents in the process of operation, once leakage occurs, the power supply is cut off immediately, and the reaction time is less than 0.1 seconds.

KT-928 Product parameter

Model number	KT-928	Name	Rotary Brush Air Duct Cleaning Machine
voltage	220V (110Vreplaceable)	Cleaning diameter	80-800mm
power	200W	rotate speed	0-1000r/min
weight of the main unit	43kg	size of the main unit	915*545*885mm
flexible shaft length	22m&45m		
Equipment standard: host, high elastic hose (flexible shaft), cleaning brush, guide bracket, certificate, warranty card, manual. 1 for each			
The KT-928 product is available with an optional 110V voltage			
(The company's products will be updated from time to time, such as parameters, appearance details, packaging, color, accessories, etc., the content is for reference only, the specific object shall prevail!)
